

PABA KARUNARATHNE

Junior Business Analyst | Project Coordinator | Software Engineering Background

Kandy, Sri Lanka | 077 2308417 | pwkarunarathne28@gmail.com | LinkedIn: [Paba Karunarathne](#) | GitHub: [Paba Waruni](#)

PROFESSIONAL SUMMARY

Detail oriented Software Engineering professional transitioning toward Junior Business Analyst and Project Coordinator roles, with experience supporting project coordination, requirement validation, task tracking, documentation, software testing, and cross functional collaboration. Hands on technical background in APIs, databases, web applications, cloud services, and QA enables effective communication with technical teams. Strong analytical problem solving, active listening, organization, and communication skills, with practical exposure to Agile/Scrum environments and project management tools.

CORE SKILLS

- 🚦 **Business Analysis:** Requirements Analysis, Requirement Validation, Business Needs Understanding, User Stories, Acceptance Criteria, Process Analysis, Documentation, Stakeholder Communication
- 🚦 **Project Coordination:** Task Tracking, Sprint Planning, Backlog Refinement, Progress Tracking, Risk and Issue Tracking, Team Coordination, Documentation, Task Handover, On Time Delivery
- 🚦 **Agile & Collaboration:** SDLC, STLC, Agile, Scrum, Kanban, Jira, Trello, Planka, ClickUp, Slack, Microsoft Teams, Google Meet
- 🚦 **Technical Understanding:** REST APIs, Python, Flask, FastAPI, Node.js, Express, JavaScript, React, MySQL, AWS IoT Core, AWS S3, Firebase, Git, GitHub, GitLab, Docker
- 🚦 **QA & Testing:** Manual Testing, Test Case Design, Test Plans, API Testing, Postman, Selenium, Playwright, Appium, Defect Identification, Defect Documentation and Verification,

PROFESSIONAL EXPERIENCE

Project Coordinator & QA Engineer US Based Technology Company

Part time | January – Present

- Coordinate project activities and track tasks across the development workflow.
- Support project planning, task prioritization, progress tracking, and coordination with technical team members.
- Clarify requirements and follow up on project tasks to support timely delivery.
- Perform automated end to end testing using **Playwright** for critical ticket selling workflows.
- Develop and maintain automated test scenarios covering key user journeys and business processes.
- Identify, document, and follow up on defects and verify fixes before release.
- Collaborate with technical team members to investigate issues and communicate testing findings.
- Support product quality and release readiness through structured QA and automation activities.

Project Management & Collaboration | The Usual Next S.R.L

Oct 2025 – Apr 2026

- Managed Kanban boards for sprint planning, backlog refinement, task organization, and progress tracking to keep work aligned with project goals.
- Coordinated requirement validation with development teams to confirm deliverables matched specifications and business needs.
- Supported cross functional collaboration through task tracking, documentation, communication, and effective handovers.

- Used Git for version control, task tracking, and peer code reviews while collaborating with technical team members.
- Supported risk mitigation and on time delivery through organized follow up, progress monitoring, and team coordination.

Software Engineer Intern | RootLogitech Pvt Ltd

Nov 2024 – Oct 2025

- Developed and supported backend APIs using Flask, Express, and MySQL, building practical understanding of software requirements and technical implementation.
- Contributed to frontend development using React and Material UI while collaborating with development activities across application components.
- Performed API testing with Postman, debugging, and QA validation to identify issues and verify expected system behavior.
- Identified, documented, and verified defects, supporting communication between development and QA activities.
- Applied Git and Docker practices while working within software development workflows and team collaboration processes.

EDUCATION

- **Bachelor of Software Engineering (Undergraduate)** The Open University of Sri Lanka | 2021 – Present
- **G.C.E. Advanced Level** St. Anthony's Girls' College, Kandy | 2017 – 2020
Physical Science Stream with ICT | Passed | Z score: 0.3014

SELECTED PROJECT EXPERIENCE

Smart Procurement System for Fresh Tea Leaf Evaluation (Leaf Sense)

- Worked on a software and IoT based procurement system involving image processing, environmental sensors, cloud services, backend APIs, and a web dashboard.
- Contributed to requirements oriented thinking across system workflows, data capture, AI evaluation, reporting, and procurement decision support.
- Worked with a technical architecture involving Raspberry Pi, Python, FastAPI, AWS services, machine learning components, and a Next.js dashboard.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Robotics Challenge Impacto 2024: 2nd Place, Autonomous Robot Game (University Category), The Open University of Sri Lanka.
- Early Warning Innovation Challenge, FLASH 2025: Selected Top 10 Category, organized by the Disaster Management Center, WFP Sri Lanka, and Ceylon Chamber of Commerce.
- School leadership and extracurricular involvement including Senior Prefect, Science Club committee member, Information & Technology Society member, Western Band, and Drama Club.
